Who are PQC Management Systems?

PQC Management Systems (PQC) provides mentoring and audit services to organisations who wish to achieve best practice.

How does it work?

PQC reviews your business using Safe-T Check and other audit tools to evaluate your current level of compliance and map a managed path to compliance. PQC then uses My HSEQ Management Systems to provide the backbone of your compliance

Get Safe Training to manage your business' progress to best practice.

Who should use PQC Management Systems?

PQC Management Systems are recommended for any organisation wishing to provide services to Government, mining or major corporate entities where Pre-Qualified Contractor status is required.

What if my business already has "Pre-Qualified Contractor" status?

PQC can provide solutions that will make continued compliance easier and assist your business with the stringent requirements to upgrade your status to the next level.

What can PQC Management Systems do for my business?

Using MyHSEQ Management Systems, PQC can assess your current level of compliance, then provide economical solutions through use of various systems. A safe, well organised workplace supports content, productive workers, which leads to less downtime, and lower workers compensation premiums and return to work costs – increasing profitability for your business.

Tell me more about PQC Management Systems – Contractor Management

Contractor and sub-contractor compliance is a specialised and time consuming activity, requiring verification of licensing, ABN, training and legislative compliance. PQC has an industry approved accreditation process, which can be managed, in place to pre-qualify contractors and sub-contractors, assisting your business to make informed decisions.

How much does PQC Management Systems – Contractor Management cost?

PQC can assess your needs and provide a quote
